Installation manual Dedicated PART 2/2

MANUFACTURER	SKODA
TYPE	OCTAVIA
ENGINE DISPLACEMENT	1400
NUMBER OF VALVES	16V
ENGINE CODE / NUMBER	CAXA
VEHICLE CATEGORIES	M
TRANSMISSION	MT
VERSION	Direct LiquiMax-2.0
PETROL ECU MANUFACTURER / CODE	BOSCH MED 17.5
HIGH PRESSURE PETROL PUMP	Hitachi Gen-2
HIGH PRESSURE PETROL INJECTOR	x
MODEL YEAR:	2009>
SYSTEM APPROVAL NUMBER (R115)	E4-115R-000010 / DLM-LPG 03
LOCATION SYSTEM STICKER	right side, centre door post
ENGINE SET NUMBER	364/070001/A
MANUAL NUMBER	076/3600800
DATE	2014-04-03

FOR EXPLANATION AND CIRCUIT DIAGRAMS SEE : INSTALLATION MANUAL GENERAL PART 1 / 2

General instructions

- The installation of the system shall be done in accordance with the installation manual provided by Prins Autogassystemen.
- This manual is based on Dutch regulations, always install the system in accordance to the local regulations.
- For an optimal functioning of the Direct Liqui Max system, maintain a clean and organized work environment during installation and maintenance to prevent pollution of the LPG components.
- Always download the “general manual 1/2 “ from our website for basic instructions and diagrams.
- Always disconnect the battery when installing the lpg system. Make sure the ignition key is outside the car. Be aware of central door locking, radio / telephone memory code, alarm system.
- Wear safety goggles when working on petrol filled system / connections (pressurized petrol)
- Do not place the main fuse into the fuse holder before having completed the installation of the system.
- The lpg computer has to be activated by means of the Prins diagnosis software.
- Never disconnect the lpg computer connector, unless you have removed the main fuse.
- When installing the wiring harness, ensure that it does not run near any of the ignition components.

Solder and insulate all electrical connections.

The wires in the loom are provided with numbers and text. The text on the wire explains the function of the wire. The wire harness is not model specific, therefore it may be necessary to adjust the length of the wires. Ensure maximum care is taken when connecting wiring.

Make professional joints using solder and shrink sleeve. Do not stretch the wiring harness.

- No component of the LPG-system shall be located within 100 mm of the exhaust or similar heat source, unless such components are adequately shielded against heat.
- If holes have to be drilled (wear safety glasses) for installing brackets, etc., the drilled holes must always be treated with an anti-corrosion agent, after the chips have been removed (especially when mounting a exterior filler into body work).
- After having completed the installation, check the whole system for lpg leakage; use a lpg leak detection device. Also check for leak of engine coolant, petrol and air.
- Fitting and maintenance is only allowed by Prins Autogassystemen selected LPG engineers.
- Failure to follow the instructions in this manual can result in a poor or non-working lpg installation or a dangerous situation.
- For maintenance instructions and filter registration see owner manual.
- Prins Autogassystemen is not responsible for any damages to people or objects as a result of changes to Prins products.
- Check our website regularly for diagrams, certificates, updates, info-bulletins and product information.

Register (warranty card) the system on the Prins warranty portal .

Required equipment / tools / materials for installing a complete system

- Complete workshop toolbox (wrenches, screwdrivers, cutters, pliers, ratchet, sockets)
- Car lift
- Portable computer : operating on Windows 98,W2000 or XP.
 - Internal memory : 16 Mb or more
 - Memory HD space : 5MB
 - Screen : 256 colours, advise colours 16 bits or more
 - Com port : 1 free COM port 1 or COM port 2 with a 9 or 25 pins connector
- Vehicle fuel system scan tool or OBD scan tool Prins (part nr. 099/99928)
- Exhaust gas analyser
- Multimeter
- Oscilloscope
- Prins diagnostic software
- Prins serial interface
- Torque wrench (10Nm)
- Torque wrench (200-250Nm)
- Portable light
- Assortment drill bits 4 to 12 mm
- Assortment cutters (ø 20, 30, 50, 70 mm)
- Portable drill or pneumatic drill
- Thread cutting device (male M6x1, M8x1, M10x1)
- Socket 46mm
- Air gun
- Vacuum cleaner
- Safety goggles
- Hot air gun
- Soldering iron, soldering tin
- Wire-stripping pliers
- Adhesive tape
- Adhesive sealant
- Thread locking compound
- Anti-corrosion agent / black body coating
- Gas leak detection device or foam leak spray
- Shrink sleeves

Vehicle check

- Check the vehicle drivability on petrol
- Check the fuel system for error codes (scan tool)
- Check if the catalytic converter is in good condition (exhaust gas analyzer)
- Check the condition of the ignition system (spark plugs, cables, coil)

Tightening moments

	Nm	SW
M 4 x 0,7	3,3	7
M 5 x 0,8	6,5	8
M 6 x 1,0	11,3	10
M 7 x 1,0	14,5	11
M 8 x 1	24,5	13
M 8 x 1,25	27,3	13
M 10 x 1	52	15-16-17
M 10 x 1,5	54	15-16-17
(filtered)Banjo bolt	10	14
Supply line connection	15	13
Fuel module Allen bolts	20	7
Filler hose connection	50	22
HPP cover Hitachi	220	46

EXPLANATION OF SYMBOLS :

= IMPORTANT,
CAUTION

= WEAR SAFETY GOGGLES

Direct LiquiMax

Overview Direct Liqui Max

overview Direct Liqui Max

Direct Liqui Max parts / approval numbers

 1st generation  2nd generation	 1st generation  2nd generation
Fuel Supply Unit : E4-67R-010269	Fuel Return Unit : E4-67R-010270 Pressure Sensor : E4-67R-010051
	
Boost pump	High Pressure Pump : E4-67R-010266 High Pressure Rail : E4-67R-010267 High Pressure Injectors : E4-67R-010309
	 XD-3 LPG  XD-4 LPG
Prins ECU : E4-67R-010098 E4-10R-030507	Fuel lines series XD : E4-67R-010247 XD3 E4-67R-010247 XD4

Mounting and connection points

A : High pressure petrol pump	L : R115 Approval sticker
B : Fuel Supply Unit : FSU	M : Grommet
C : Fuel Return Unit : FRU	N : Gas system fuses
D : Boost pump	P : T-ect
E : Lpg computer	Q : Low pressure signal
F : Boost pump relay	R : MAP, Analog 3
G : Tank relay	S : Analog 2
H : Petrol ECU	T : Analog 4
I : Engine speed signal RPM	V : Digital input 3
J : “+” ignition	W : Wake-Up
K : High pressure signal Analog 1	X : Digital input

L:
R115 approval sticker :
Right side centre door post

High pressure pump connection

Remove the High petrol pressure pump. Careful : petrol !
(Follow the workshop manual of the car) also see page 4.

Remove petrol inlet

Install new banjo adaptor

High pressure pump connection

Replace the high pressure pump cover (46mm) for the adapted high pressure pump. Careful : petrol !
Carefully cut the cover, remove shockers and install them into the new cover. Reinstall pump.

Tighten cover with 220 Nm

Boost pump

Install bracket with original manifold bolts.

Connection of the fuel hose to the boost pump.

Connect the original fuel hose (with a XD-5 banjo eye and 15,3 clamp) to the boost pump.

Fuel Supply Unit / Fuel Return Unit

Black filtered banjo will only be used on inlet connections !

Filter inside sensor banjo

Mounting the Fuel Supply and Return Unit

4x: M6x10

Fuel Return Pressure sensor

Pressure sensor : re-located on this engine
Sensor and sensor banjo located on HP petrol pump

Lpg / petrol fuel lines

Hose	from	to	Length (cm)
	Adapter original petrol hose	Petrol boost pump	XD-5 banjo eye
XD-	Fuel supply unit	High pressure petrol pump	25
XD-	Petrol boost pump	Fuel supply unit	20
XD-	Fuel return unit	High pressure petrol pump	20
XD-	Fuel return unit	High pressure petrol rail	n.a.

Install the fuel line using two bonded seal washers and banjo bolt :

Filtered banjo: (FSU supply inlets / boost pump inlet : black filtered banjo) :

Supply hose – Return hose – Tank wiring

Protect the supply- and return hose together with tank-wiring using the Ø16 split tube.
Mount the "hose assembly " with clamps, with a maximum distance of 40cm.

Hose routing

Mounting the AFC

Remove wipers / wiper box / petrol ecu and plastic support

Adapt ecu support:

For petrol ecu remove 1 rib

Install the ecu holders with four plastic clips and two M6 bolts

Mounting the AFC and petrol ecu

Wiring routing

Mounting the fuel selection switch

BEWARE of wiper motor arm.

Remove the cover behind wiper motor and drill a hole into the cover to put the wiring through.

Wiring inside : switch / can / . Be sure it's watertight again.

Fuses / Relay

Join the fuses with the M6 threaded inserts

Electrical connections

Check and measure the wiring in case of changes in the cars wiring colours.
Insulate not used wires.

Wire number / code	Wire colour	Connection
1-32 MAIN GND ecu MAIN GROUND SENSE MAIN GND pump driver MAIN GND boost pump	brown	Connect to the '-' of the battery (-31) ; use a ring terminal. Wire location :Left-side on the shock damper original point. LPG wiring Main ground 3x M8 eyes colour brown
4 – 13 – 44 +12V BATT sense +12V BATT fused +12V BATT boost pump +12V BATT pump driver	red	Connect to the '+' of the battery (+30) ; use a ring terminal. Do not place the fuse in the holder before having completed the installation of the lpg system. Wire location : Fuses box left-side for the shock damper. LPG wiring battery 3x M6 eyes colour red

Petrol ecu in plenum chamber

121	Wake-up	Red-grey	Wire colour : thin Black Wire location :left side, under air filter box, 14-pole oval connector, pin 1
-----	---------	----------	---

Electrical connections

Check and measure the wiring in case of changes in the cars wiring colours.
Insulate not used wires.

+12V Boost pump	Red	Pin 87 of the boost pump relay

Driver room

<i>3-pole micro connector</i>		
66 Ground fuel switch	Brown	Connect the 3-pole connector to the Prins fuel selection switch.
3 +12V fuel switch	Red	
49 LIN fuel switch	yellow	
51 CAN-High	Blue-yellow	EOBD connector pin 6
70 CAN-Low	Blue	EOBD connector pin 14

Electrical connections

Check and measure the wiring in case of changes in the cars wiring colours.
Insulate not used wires.

Lpg tank housing

Wire number / code	Wire colour	Connection
3-pole tank level connector 40 Ground tank gauge 12 Tank level in 11 + tank level supply	Brown Blue Red	Connect the 3-pole connector to the tank level sensor. Connector pin 1 Connector pin 2 Connector pin 3
1. 2-pole connector tank lock-off	Green-yellow Brown	Pump driver to lock-off power Pump driver to lock-off ground
2. 3-pole fusite	Red Brown -	1. Pump power 2. Pump ground 3. not used
3. 2-pole connector tank pump	Red 2.5mm ² Brown 2.5mm ²	Pump driver power Pump driver ground
4. 2-pole connector	Grey Green	Pump driver diagnose Pump driver control

Wiring tank relay 2 + tank relay 26 Ground tank relay +12V BATT fused +12V pump driver	Red Green-yellow Red 2.5mm ² Red 2.5mm ²	Pin 86 of the tank relay Pin 85 of the tank relay Pin 30 of the tank relay Pin 87 of the tank relay
--	---	--

Checklist after installation

1. Install the system fuses.
Turn on ignition.
Connect the Prins interface wire and run the Prins diagnosis program.
When working on the car, beware of moving and rotating parts in the engine compartment (even when the engine is not running !!).
2. When commissioning the LPG system, you must activate the LPG computer with the diagnosis software.
3. Check whether the program in the LPG computer matches with the car (dedicated engine set):
See "Identification" in the diagnosis program.
4. Check all components and connections for any LPG leakage, use a LPG leak detector device or a fluid detection like soap. Also check for petrol leakage. Make sure the solenoid valves are in open position.
No evidence of leakage is permitted.
Caution for moving and rotating parts in the engine compartment !
5. Use the diagnosis software to check again all input and output signals.
6. Check the system for error codes and solve these, if required.
Check the petrol MMS for EOBD error codes.
Place the protection connector back on the diagnose connector.
7. Make a test drive and check the cars drivability on LPG and petrol.
